THE BENEFITS OF AIRTRACKS

THE BENEFITS OF AIRTRACK FACTORY

COMPLETELY SILENT

ADJUST THE PRESSURE TO GET THE PERFECT BOUNCE FOR EVERY SKILL LEVEL

INJURIES ARE LESS LIKELY TO HAPPEN DUE TO THE SOFT AND FORGIVING SURFACE

SKILLS IMPROVE MORE RAPIDLY THAN WITH TRADITIONAL EQUIPMENT

SMALL IN STORAGE, EASY TO USE AND LIGHTWEIGHT

GO FROM A TUMBLETRACK FEEL TO A GYMNASTICS FLOOR BY ADJUSTING PRESSURE

DEFLATED IT FITS IN THE TRUNK OF ANY CAR

INVENTOR OF THE HOME AIRTRACKS AND MANY MORE!

OVER 70 RESELLERS ALL OVER THE WORLD

EXTENSIVE QUALITY CONTROL AND UNIQUE PRODUCT NUMBERS

UP TO 5 YEARS OF WARRANTY

OVER 30 YEARS OF EXPERIENCE

EXTRA STRONG SEAM PROTECTION TECHNOLOGY

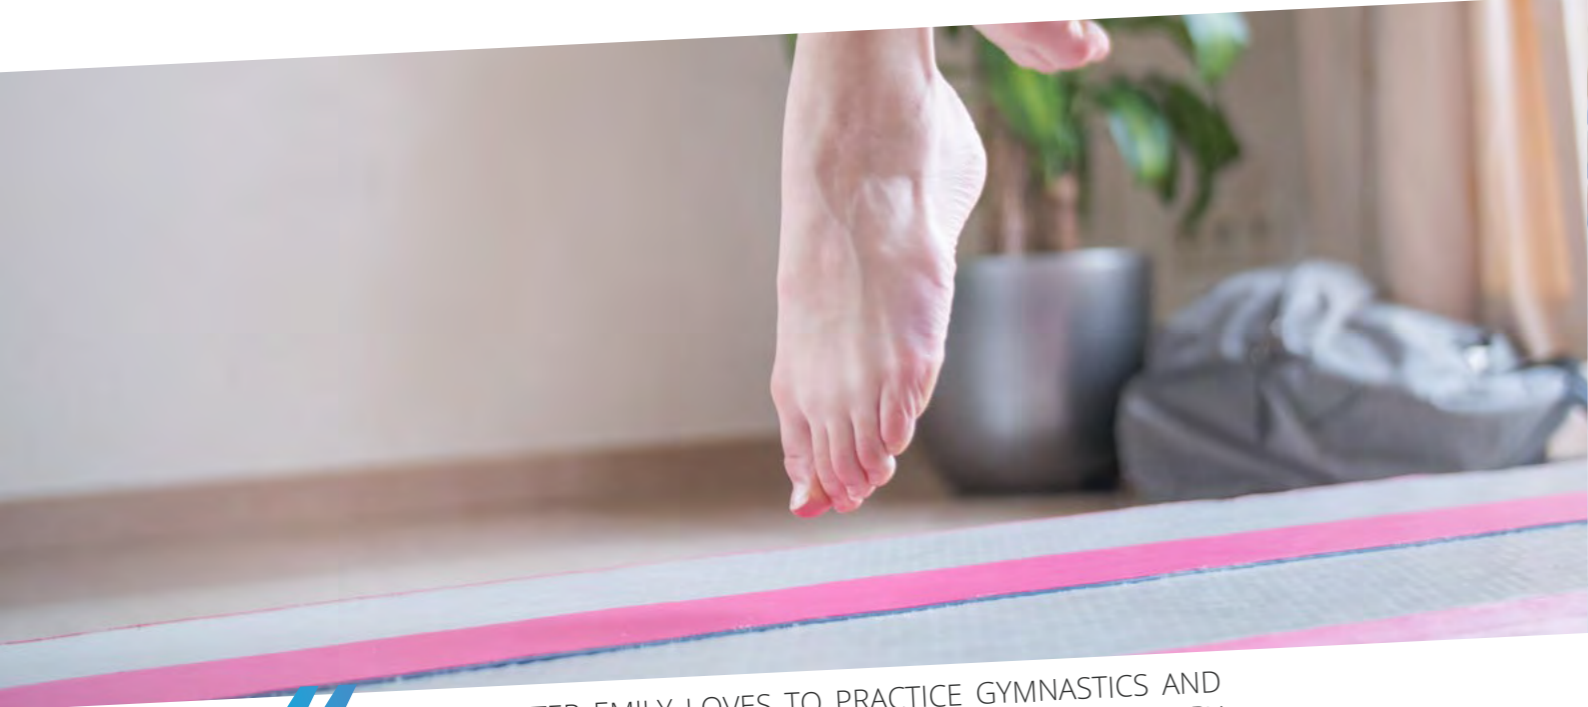

HANDMADE BY A TEAM OF EXPERTS

DESIGNED IN THE NETHERLANDS WITH PROFESSIONAL ATHLETES AND COACHES

HOME USE

“MY DAUGHTER EMILY LOVES TO PRACTICE GYMNASTICS AND REFINE HER SKILLS AT HOME AND WITH AIRTRACK FACTORY I KNOW THAT I CAN TRUST THE PRODUCTS TO CUSHION ANY FALLS.”

CLAIRE WILLIS

MOTHER OF AIRTRACK FACTORY AMBASSADOR
@GYMNAST_EMILY10

Nothing beats a great training session, but how do you train when you can't go to your club?

AirTrack Factory has developed a range of safe home training equipment to enable you to take your training home. Create your own setups using our mats and practice your skills anytime you want.

Our home equipment is made with the same high quality materials and techniques we use for our professional AirTracks!

Assure yourself of a safe training environment by using an AirBeam, AirSpot, AirFloor or Training Set - Home Edition.

Level up and have fun!

GYMNASTICS

“AIRTRACKS ARE SOFTER AND ARE BETTER FOR JUMPING COMPARED TO THE TRADITIONAL FLOOR. AS A RESULT, WE CAN PLACE MORE EMPHASIS ON TECHNIQUE, GYMNASTS CAN TRAIN LONGER AND LEARN ELEMENTS MUCH FASTER.”

KATE SARISSKA

HEAD COACH BATO (NL) AND FORMER OLYMPIAN

The very first AirTracks were designed for- and by gymnasts. Nowadays, gyms are replacing conventional gymnastic equipment, like the vault box, foam mats and springboards with AirEquipment.

Our mats distinguish themselves because they are soft on the body, light weight and easy and small to store, while conventional equipment is heavy, voluminous and tough on the body.

Training is safer, more fun and more effective on AirTracks than on conventional equipment. Gymnasts of all skill levels will have a blast!

Discover all equipment in this catalog and find out what you can add to your gym.

PARKOUR & FREERUNNING

TRICKING & MARTIAL ARTS

“I’M STILL AMAZED AT HOW MUCH FUN AND VARIATION THE AIRTRICK KEEPS ON OFFERING!” **DAMIEN WALTERS**
 HOLLYWOOD STUNTMAN
 YOUTUBER
 FREERUNNER

“THE AIRTRICK IS A DEFINITE FAVORITE OF BOTH THE PROFESSIONAL TRICKERS AND THE YOUNGER KIDS.”
TRAVIS WONG
 TRICKER
 MARTIAL ARTS HALL OF FAME

World famous athletes such as pro freerunner ‘DK’ and professional stuntman Damien Walters vouch for the possibilities to go huge on the AirTrick.

The AirTrick is the first surface specially designed for tricking and freerunning. With its big and bouncy surface, it is ideal for practicing beginner and advanced moves.

The AirBox in combination with an AirTrick is ideal for parkour and freerunning. Separate parts can be used individually or stacked together to be used as an vault box. The high bounce and soft characteristics lower your fear level and big tricks are guaranteed!

Everyone, young and old, beginner or pro, will have a great and fun session!

Do you prefer a thin, stable and safe surface for martial arts or do you like to catch some big air? AirTrack Factory offers equipment every (extreme) martial artist will love!

Our 10 cm thick AirFloor is ideal for practising stability, agility, strength, endurance and speed. Connect multiple AirFloors to create an entire lightweight and portable floor for training and demos.

Like to go big? Try our famous 30 cm thick AirTrick! By adjusting the pressure you can find your ideal bounce. The AirTrick is famous for the incredible height it gives you. It is ideal for practising big moves and you will see yourself doubling up in no time!

ATTRACTIONS

“THIS PRODUCT IS THE ANSWER FOR THE NEEDS OF YOUNG PEOPLE WHO WANT TO SAFELY EXERCISE THEIR SKILLS”
JANNE JÄRVENPÄÄ
 CEO RS PARKS OY (FINLAND)

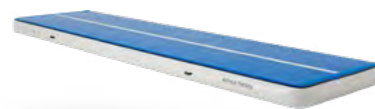

Trampoline parks are popping up all over the world. For park owners it's a challenge to find equipment that is innovative, fun, safe, durable, but also cost efficient. With hardly any maintenance costs, customized AirTricks are the new trend for trampoline parks!

AirTricks are not a substitute for trampolines, but they offer a broad range of new possibilities to your park. They are bouncy for jumping and soft for landing, but also stable enough for running and playing. You can add your own line markings to create a soccer-, volleyball- or basketball field.

We also produce AirBags for all sizes, with custom branding options, to make sure your park is well presented, not only in quality, but in aesthetics as well.

AirFloor 3x1m

AirTrack P3

CHEERLEADING

“THE AIRTRACK IS RAPIDLY BECOMING THE MOST POPULAR TUMBLING TRACK FOR CHEERLEADERS”
ANGEL RICE
 TUMBLER / CHEERLEADER
 WORLD RECORD HOLDER
 WORLD CHAMPION

AirTracks are ideal for cheerleading; soft on the body, bouncy like a spring floor and stable enough for pyramids!

Improve your tumbling skills on the AirTrack P2, P3, or choose an AirFloor for all-round cheer exercises. They are all very small in storage and extremely fast in setup, making them ideal for cheer clubs that want to level up but do not have the space or budget for a permanent floor.

Add 35 mm carpet bonded foam to an AirFloor to create a portable spring floor alternative. Combine multiple AirFloors using our seamless connection method to create a complete competition floor.

A competition floor is set up within 45 minutes. Get in touch with us for more info!

SCHOOL SPORTS

“THE AIRTRACK EQUIPMENT HAVE NOW TAKEN A PERMANENT PLACE IN OUR LESSONS. WHEN WE WORK WITH THE AIRTRACK, THE STUDENTS ARE MOTIVATED AND DON'T WANT TO STOP.”

PAUL BAUMEISTER
PHYSICAL EDUCATION TEACHER (NL)

Boost your gym classes!

Gym teachers are always on the lookout for new ways to get students to be motivated and exercise. Working with AirTracks is fun, easy, safe and invites students to move. Get your class started in no time, as they are lightweight and easy to set-up.

Make learning safe and easy!

Research has shown that students improve their motor skills faster when they practice on AirTrack equipment. Not only that, but their confidence improves as well by training on the safe and soft equipment.

VITALITY

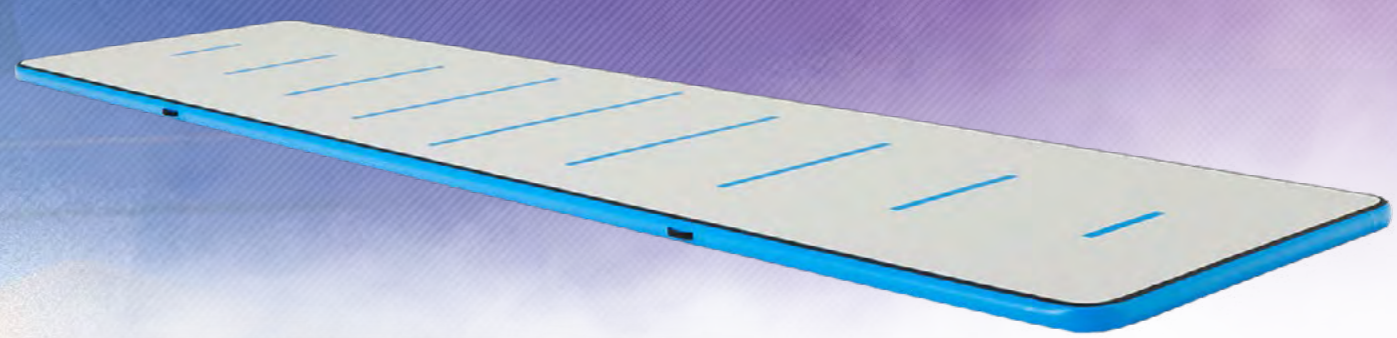

“AIRTRACKS HAVE COMPLETELY OPENED UP A NEW DOOR OF FITNESS FOR US. WE'RE NOW ABLE TO MOVE OUR TRAINING FROM OUR BACKYARD, TO A PARK, OR...ANYWHERE. THAT'S THE BEAUTY OF IT.”

AUSTIN RAYE
FITNESS INSTRUCTOR
FORMER TUMBLING COACH
SOCIAL INFLUENCER

Bouncing, balancing or just a regular workout, AirTrack Factory equipment is very suitable for fitness, due to the soft surface.

Want to work on your core stability? Try balancing on one leg and feel every muscle in your leg and core searching for balance! Jumping in place will not only give you a smile, but it will also burn those calories like no other workout.

Or try out our AquaBag and AquaBall. When filled with water and air, these training bags will increase imbalance in every movement. Constant corrections help strengthen muscles that would otherwise be ignored. The largest size can weigh up to 40kg! Due to the versatility of the AquaLine the equipment is suited for Core, Strength, Coordination and much more!

AIR FLOOR

The 10 cm thick AirFloor is our thinnest track. Its portability and stability make the AirFloor great for gymnastics, cheerleading, martial arts and senior gym. Softer on the body than foam, bouncier than a spring floor and highly versatile, the AirFloor offers a unique training experience.

Connect multiple AirFloors to create one large surface, up to the size of a full competition floor. Adding Carpet Bonded Foam on top of these tracks transforms them into a portable, easy to set-up floor resembling the spring floor!

Easy on the joints

Accessories

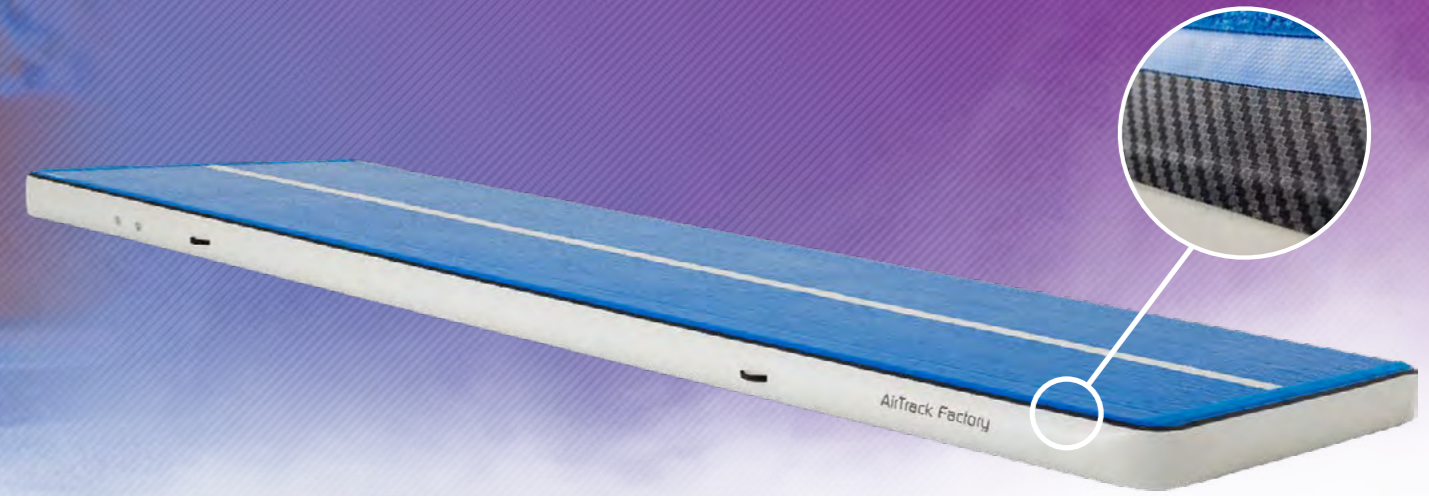

Transport Bag (included)

OV10 Blower (required)

Foot pump

Manometer (pressure gauge)

AIR TRACK P2

The AirTrack P2 is the middle thickness mat. It's easy on the body at low pressures, but comes close to a spring floor at higher pressures. The mat is 2 meter wide and pairs well with similarly thick 20 cm landing mats, creating a level stepping surface off or around the AirTrack P2 mat.

Our P2 products have a height of 20 cm and therefore gives more bounce than the AirFloor, but less bounce than the P3 models. The P2 is therefore not only suitable for recreational groups, but also for higher level gymnasts.

In combination with add-ons such as the AirIncline or our renewed AirBox system, training possibilities will be endless!

-  Expandable with add-ons
-  Fits in any storage or car
-  Completely silent

- Required blower: Hikoki blower 
- Inflation time 12 x 2m: 1 min 18 sec 
- Adjust the pressure to your preference

AIR TRACK P3

Our signature AirTrack P3 is our most versatile track. Not only is it a great training tool for professional athletes, you will find everybody, young or old, having a blast on these AirTracks!

By playing around with the air pressure, this 30 cm thick track can be softened for a slow and easy bounce or firm for a fast and technical bounce. While the 2.0 meter wide AirTracks match the width of standard landing mats, the 2.8 meter wide version can be used as a 2-lane track, ideal for training sessions with large (school) groups.

When you're done with your training, even our biggest standard AirTrack of 15 x 2.8 m can be rolled up and stored in less than 10 minutes! Ideal for transport and storage!

- ↕ Maximum options for pressure variation
- 🛍 Fits in any storage or car
- 🔇 Completely silent

AIR TRICK

If you've been looking for a way to boost your skills faster than ever, you've found it! The AirTrick is the first floor that is specially designed for tricking and freerunning. The thick and wide surface generates a bounce like no other floor and is ideal for practicing both beginner and advanced moves.

The AirTrick is perfect for large groups and free movement, which makes the AirTrick perfect for trampoline parks. Everybody, young or old, recreational or professionals will have a blast on the AirTrick! World famous athletes such as pro freerunner 'DK' and professional stuntman Damien Walters vouch for the possibilities to go huge on the AirTrick.

AIRBAG S

The brand-new AirBag S is the newest addition to our sports line. It is a 70cm high crash mat for any sport that involves jumping.

By adjusting the pressure, you can easily transform the AirBag from a crash mat to a landing area suitable for upright landings. The AirBag is hygienic, and thus future proof.

It is relatively small in storage, adjustable in pressure and easily connected with the AirTrack P2 or the AirTrack P3. Each AirBag comes with an AirTrack Factory topsheet which features safety markers, so you know where to land.

All apparatus applicable

Required blower: AirBag Blower Small (Yellow)

Relatively portable and small in storage

AIR FLOOR HOME BOARD & BLOCK

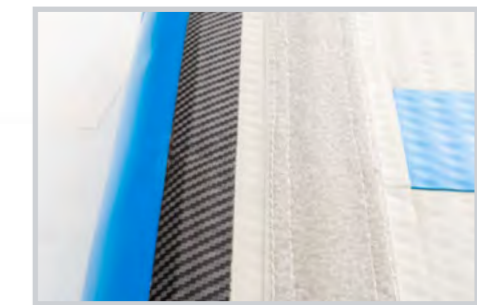

AIRFLOOR (3 x 1 x 0.1 m or 5 x 1 x 0.1 m)
 This AirFloor works perfectly for all floor exercises and all tumbling passes. From gymnastics to parkour, kung-fu class to physiotherapy; the AirFloor is a great basis for a wide variety of sports and training methods.

AIRBOARD (0.6 x 1 x 0.1 m)
 The AirBoard can be used as a springboard and is light-weight, easy to set-up and reposition. Create various training set-ups in and around the house. Tip: use your mattress as a landing mat!

AIRBLOCK (0.6 x 1 x 0.2 m)
 This lightweight AirBlock is even bouncier than the AirBoard. The airblock, in combination with the AirFloor offers a great platform for learning standing flips

Item	
AirFloor Home	3 x 1 x 0.1 m
AirFloor Home XL	5 x 1 x 0.1 m
AirBoard	0.6 x 1 x 0.1 m
AirBlock	0.6 x 1 x 0.2 m

 - Velcro strip to connect multiple elements
 - Trackconnect

AIR TRACK TRAINING SET

This set provides you with unlimited training variations. Thanks to the compact sizes you can just pick your spot in the gym and start training! Sturdy Velcro holds the mats in place to prevent movement during training.

The set works perfectly for all floor exercises and all tumbling passes. Stack the AirBoard and AirBlock using the Velcro connectors and create endless training variations. Use the AirBoard as a spring board and the AirRoll for balance exercises or learning flips.

These soft, bouncy and close to the ground tracks make gym exercises fun and safe for kids. Without the AirRoll this set is great for Home Use as well. The sets are available in pink, blue and our new Spark color.

-  Easy on the body
-  Fits in any storage or car
-  Completely silent
- Required blower: Foot pump
- Inflation time Training Set: 5 min
- Without AirRoll suitable for home use

Item

Training Set (4pcs)

Included in this set:

AirFloor	3 x 1 x 0.1 m
AirBoard	0.6 x 1 x 0.1 m
AirBlock	0.6 x 1 x 0.2 m
AirRoll	Ø 0.6 x 1.2 m

Item

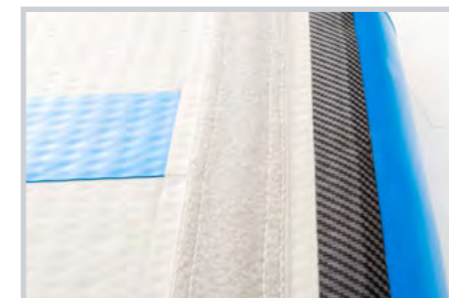

Training Set - Home Edition (3pcs)

Included in this set:

AirFloor	3 x 1 x 0.1 m
AirBoard	0.6 x 1 x 0.1 m
AirBlock	0.6 x 1 x 0.2 m

Accessories

- Foot pump
- OV10 Blower instead of foot pump
- Transpot bag S
- Extra AirBoard

AIR TRACK SPARK

The AirTrack Spark is larger and thicker than any of our other AirTracks for home training: 5 x 1.4m (we recommend the OV10 for inflating the Spark). Our specially designed 20cm thick Sports Double-Wall fabric make the AirTrack Spark the best bouncing home track so far.

The 2 times larger surface makes it even more safe and versatile than any of our Home Equipment and the seam protection will ensure you get the strongest AirTrack available. You only need a spark to start your fire.

-  Easy on the body
-  Small in storage
-  Completely silent

Adjust the pressure to your preference

AIR BEAM

Gain confidence on the beam without risking major injuries!

Lower your fear barrier and the chance of injuries while practising beam exercises at home, in your garden or gym! Thanks to the 10 cm wide and 2.5 mm thick center line, gymnasts feel the edge of the beam, enabling them to focus on their landings.

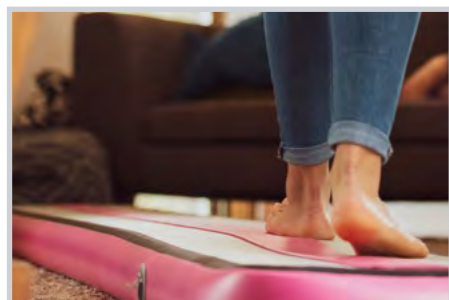

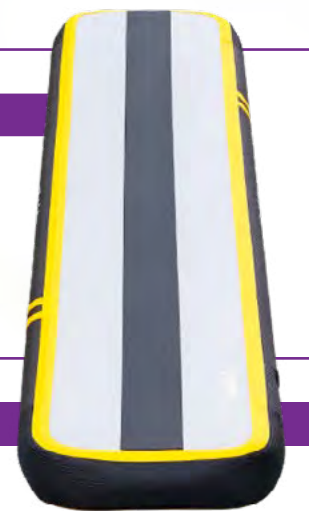

The total width of the AirBeam is 40 cm, which is wide enough to land next to the beam without spraining an ankle. The AirBeam comes in lengths of 3 m and 5 m and is available in pink, blue and our new Spark color.

Item

AirBeam	3 x 0.4 x 0.1 m
AirBeam	5 x 0.4 x 0.1 m

Accessories

Foot pump
Carrying bag M

AIR SPOT

The AirSpot is a round version of our AirFloor, AirTrack P2 and AirTrack p3. Its round shape gives the product a different look and offers wide variations in usage.

The soft and bouncy AirSpots motivate kids to move and jump freely! Coordination and balance are improved along the way.

Besides being a great piece of equipment for gymnastics and fitness, they also serve as comfortable pads for people who prefer standing at work! The AirSpots are available in pink, blue and our new Spark color (the Spark P3 is available on request).

AIRBOX

These patented portable sets are combinations of 3 small AirTrack P3 elements that can be used as standalone equipment or on top of an AirTrack. Stack 1, 2 or all 3 elements on top of an AirTrack for methodical training exercises, or use the complete set as a child friendly vault box.

Using the AirBox mounting kit, the AirBox can be firmly anchored to an AirTrack, AirFloor or any other object.

The 90 cm AirBox is a great alternative for a regular vault box or Pegasus for gymnastics and schoolsports. Using the 140 cm AirBox you can create even more creative set-ups for gymnastics, schoolsports, freerunning and parkour.

Using the AirBox, children will learn their skills faster, safer and with more fun!

Item

AIR TAKE-OFF SET

The AirTrack Take Off set is a combination of the new AirRoll Take Off and an 8 meter AirTrack P3. This basic set can be upgraded with the AirBox Set and the AirIncline. All items have a width of 2.0 or 2.8 meters.

The set offers a safe and fun alternative for the minitramp, the vault box and big heavy mats. It is a great tool to practise gymnastical exercises, but it can also offer a new dimension to dodgeball, basketball, volleyball and more! Great for schools or recreational sports.

AIR JUMP SET

The AirJump set is our most multi-purpose training equipment. It's a complete training station ideal for gyms and especially primary schools. With strong Velcro strips, all individual parts can be positioned and connected to create a soft vault box, stairs, incline, jumping pad and more! Ideal for a large variety of exercises.

Thanks to the soft and bouncy surface, children will be able to learn new skills more easily. At the same time, teachers and trainers are better off setting up this light weight AirJump set instead of setting up conventional equipment.

The complete AirJump set comes in three transport bags which fit in any car and storage. It's easy to take along and easy to set up within five minutes.

Item

AIR TRACK COMPETITION FLOOR

A competition floor that is fully adjustable in pressure, so that all athletes can perform their routine on a floor that is set exactly to their body type and skill level.

The bounce you're familiar with. The safety you expect. A set-up time you never thought was possible.

Trusted by the Dutch Gymnastics federation, and loved by those who can set it up four times as fast than you would be able to with a regular spring floor.

AIR BOARD BOOST

This AirBoard evolution will give your training the boost you need!

With a brand new all surface solution, this new product can be easily attached on both a springfloor with velcro or on a regular gym floor with AirCups creating a vacuum.

This equipment has a double air compartment that enables younger, lighter athletes to bounce more efficient! Unlike traditional materials it can be easily carried and set-up by all ages. Heavier gymnasts can fully benefit the AirBoard Boost by easily adjusting the pressure to their own liking.

AIR ROLLS

The AirRolls are developed to help gymnasts learn front- and back handsprings. More advanced gymnasts train their rebound and balance on the AirRolls. Besides these training options for gymnasts, they also offer a lot of play options for little kids. The three available sizes are suitable for small, medium and tall gymnasts.

Our AirRoll Stabilizer helps keep the AirRoll in place, allowing gymnasts to practice alone. This also greatly speeds up group exercises. Fits all AirRoll sizes!

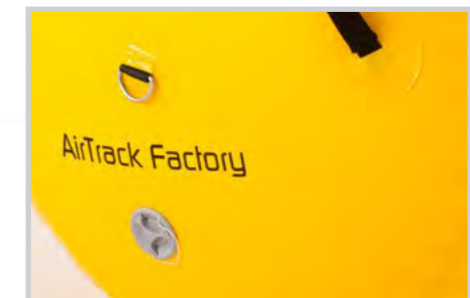

Item

AirRoll Blue	Ø 0.6 x 1.2 m	(for people who are <1.2 m)
AirRoll Pink	Ø 0.6 x 1.2 m	(for people who are <1.2 m)
AirRoll Spark S	Ø 0.6 x 1.2 m	(for people who are <1.2 m)
AirRoll Yellow	Ø 0.75 x 1.2 m	(for people who are 1.2 - 1.45 m)
AirRoll Spark M	Ø 0.75 x 1.2 m	(for people who are 1.2 - 1.45 m)
AirRoll Red	Ø 0.9 x 1.2 m	(for people who are >1.45 m)

Accessories

- Foot pump
- OV10 blower
- Hikoki blower
- AirRoll Stabilizer
- Carrying bag M

AIR INCLINE

Designed for trainers who want to create easy, simple and methodical situations in their trainings. The AirIncline is easy to set up, lightweight and portable.

Exercises such as rolling, cartwheel, back handspring, handspring and front flip are easier to learn with the help of our AirIncline. The lines on the AirIncline will stimulate the children to correctly position their hands.

Because of its bounce, the AirIncline is also useful for jumping.

Easy on the body

Fits in any storage or car

Completely silent

Required blower: OV10 blower

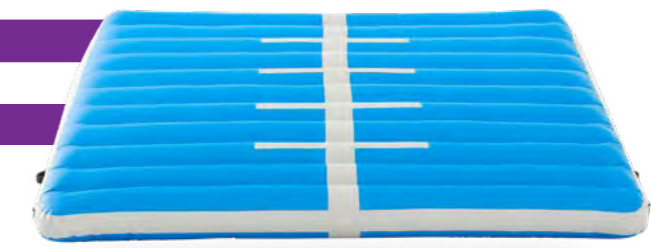

Inflation time 2 x 2 x 0.6 - 0.1m: 1 min 45 sec

Adjust the pressure to your preference

Item

AirIncline	2 x 2 x 0.4 - 0.1 m
AirIncline	2 x 1 x 0.4 - 0.1 m
AirIncline	2 x 2 x 0.6 - 0.1 m
AirIncline	2 x 2.8 x 0.6 - 0.1 m

Accessories

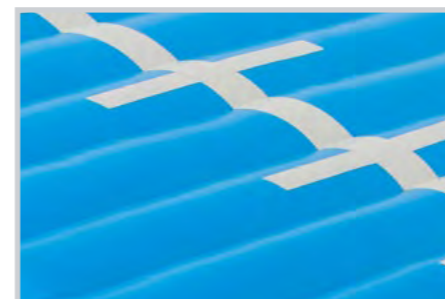

Transport bag M

AIR SPECIAL

Airtrack Factory has many years of experience making products on custom request. Custom made products are for coaches who wants to go one step further. Your need for special designed AirTracks asks for a professional approach.

On your request we can produce custom products in any size. Ask about the possibilities, prices and delivery time.

Examples of products produced in the past: AirIncline set, AirStage, AirRoll TakeOff XL, AirSteps, AirTrick Black edition and the AirBox XL.

Manometer (pressure gauge)

OUR BLOWERS

FIRM OR SOFT, FAST OR SLOW BOUNCE, IT'S UP TO YOU!

One of the things that make AirTracks unique, is the fact that the pressure can be adapted to match your ideal training situation.

Adding air with one of our light-weight blowers, or releasing air by shortly opening one of the valves, is a matter of seconds. Once you've found the ideal firmness for your AirTrack, simply close the valves and the AirTrack will maintain its pressure during your training!

Make sure the AirTrack's pressure is to your liking before each training for optimal results and safety. Use our manometer to recreate your ideal pressure.

HIKOKI BLOWER

This high volume output blower is able to inflate a 15 x 2.8 m P3 AirTrack within 4 minutes! It's the combination of valves and nozzles that makes this the perfect blower to inflate our larger mats (P2, P3 & AirTrick!)

Specifications	Value
Air pressure capacity	0 - 90 mbar
Air volume flow capacity	0 - 3.8 m ³ / min
Power input	550 W
Overall length	447 mm
Weight	2.2 kg

This high quality foot pump is suitable for all small items, e.g. the Training Set or the AirBeam. Inflation time for most AirFloors is less than 1 minute! The pump comes with a built-in manometer.

FOOT PUMP

Specifications	Value
Air pressure capacity	300 mbar
Volume	6.5 L
Dimensions	32 x 23 x 7 cm
Weight	1.4 kg

OV10 BLOWER

The OV10 blower is designed for high pressure inflation, which is required for AirFloors or when an AirTrack P2 is used by heavier users. This blower should not be used to fill large objects which are longer than 6 meter and 20 cm or thicker. These AirTracks require the Hikoki Blower.

Specifications	Value
Air pressure capacity	0 - 250 mbar
Air volume flow capacity	0 - 1.7 m ³ / min
Power input	1000 W
Overall length	150 mm
Weight	1.7 kg

The ATF infinite blower is a high volume - automatic blower, ideal for locations where large objects need to stay inflated for longer periods of time.

INFINITE BLOWER

Specifications	Value
Air pressure capacity	30 - 100 mbar
Air volume flow capacity	1.7 m ³ / min
Dimensions	Ø30 x 47 cm
Weight	8.5 kg

ACCESSORIES

OV10 BLOWER
For AirFloors and small objects, up to 250 mbar.
22 x 25 x 18 cm 1.7 kg

HIKOKI BLOWER
High volume output blower for large objects, up to 90 mbar.
34 x 22 x 19 cm 2.2 kg

FOOT PUMP
For the AirBeam, AirTrack Training Set, small objects and AirRolls, up to 500 mbar.
32 x 23 x 7 cm 1.4 kg

ATF INFINITE BLOWER
For large objects that need to stay inflated for longer periods of time.
Ø 30 x 47 cm 8.5 kg

MANOMETER
Pressure gauge that measures up to 250 mbar. Fits all our inflatable objects.
17 x 10 x 6 cm 0.3 kg

TRACKCONNECT
Seamless connection between mats. Available for mats 10, 20 or 30 cm thick. Available Light blue, Blue, Pink and Carbon black. Trackconnect includes cover and foam.
100 x 20 x 20 cm 3 kg

Item

P1
P2/P3

FOLDABLE STARTRAMP (FOAM)
Provides a smooth transition to the mat. 2 x 0.8 m, available in 20 and 30 cm height.
P2 cm: 200 x 80 x 20 cm 8 kg
P3 cm: 200 x 80 x 30 cm 10 kg

Item

P2
P3

TROLLEY
Transport your AirTrack with ease. Trolley with foldable handle.
100 x 70 x 40 cm 24 kg

Item

Trolley

CUSTOMIZATIONS & SPARE PARTS

Item

Banner / logo on object (max. 80 cm wide)

GENERAL

Are you active on social media?

Yes, we are! Follow us on:

Facebook.com/AirTrackFactory
instagram.com/airtrackfactory

Instagram.com/airtrackfamily
Youtube.com/AirTrackFactoryNL

I would like to become an AirTrack Factory distributor, what should I do?

There are still countries in which we do not have a distributor yet. If you are interested, please send us an email or give us a call and we'd be happy to inform you about the possibilities.

ABOUT OUR PRODUCTS

What pressure should I use?

This depends on the product, sports type, skill level and weight of the users. Always use enough pressure not to bottom out and refill before every new training session. Check our user manual or our website for recommended pressure levels.

Is there a chance of damaging an AirTrack by over pressurizing it?

No, the extreme pressure needed to actually damage an AirTrack cannot be reached with the blowers we supply nor the exercises you would do on it.

24 Hours after inflation the AirTrack is not hard enough anymore, do I need to repair this?

AirTracks are not designed to maintain their pressure overnight. Because of differences in temperature, they lose a bit of air. For safety reasons always adjust the pressure before training. When you have doubts, please contact us for a professional opinion.

What is the lifespan or your products?

Obviously this will depend on how, and in what frequency the products are used. A lifespan of more than 7 years is definitely not uncommon.

What guarantees do you give on your products?

We give 2 years guarantee on our products.

What is the difference between these AirTracks and the old tumbling tracks?

The new generation AirTracks from the AirTrack Factory are airtight. You do not need an expensive, big, noisy blower. A small hand-blower is enough to inflate even the biggest AirTracks within 4 minutes. Also, our new generation AirTracks only have 60% of the weight in comparison to the old tumbling tracks.

How much do your mats weigh?

There's a slight difference between the different thicknesses but, as a rule of thumb, they weigh approx. 3 kg per square meter.

Do your products comply to the European REACH regulation?

Yes, of course, our products are REACH compliant.

USAGE

Above all, carefully read and follow up the instructions in the user manual!

Can AirProducts be used outside?

When setting up AirProducts outdoors, use a groundsheet to avoid damaging the AirProduct. AirTrackFactory cannot guarantee the integrity of the products on all surfaces and in all environments. Mats left outside unattended or in extreme elements can get damaged. Please keep in mind the outside temperature affects the air pressure inside the products. Letting air out in the heat and adding air in the cold is required for safety and preventing damage. See our user manual for more info.

Can shoes be worn on AirTracks?

It's important to remember that our products - like all products - hold up as well as they're treated. Therefore, we do not recommend wearing shoes on our products.

MANUFACTURING

Are you the manufacturer of your AirTracks?

Yes, and we are proud of it! Our products are made of top quality, industrial strength materials that originate from inflatable boat production. We use the highest available quality valves, Velcro and other materials. All products are hand-made by industry professionals and under-go a strict quality control.

Where are AirTrack Factory products made?

All products are designed & engineered in the Netherlands. They are manufactured in our own fully owned factory in China.

What type of quality control steps do you take?

- 1) All materials are sourced, bought, and controlled by AirTrack Factory.
- 2) All mats under-go a multipoint inspection before being shipped out, including: a 16 hour pressure test to ensure airtight seals and pre-shipment pictures and videos are made to document each product.
- 3) AirTracks are individually labeled and documented to monitor and file the complete production process.

What type of material is used to make AirTracks?

We use a material called Double Wall Fabric (DWF) consisting of 2 layers of coated vinyl with thousands of threads connecting the two layers. Our proprietary DWF is specially engineered for athletic training - it's called SportsDWF.

What does your 2 or 5 year warranty cover?

Our warranty covers manufacturer defects, non-usage damage to all parts, including seams and surface. The 5 year warranty covers most of our items, except our accessories, AquaLine, AirBags and AirRolls.

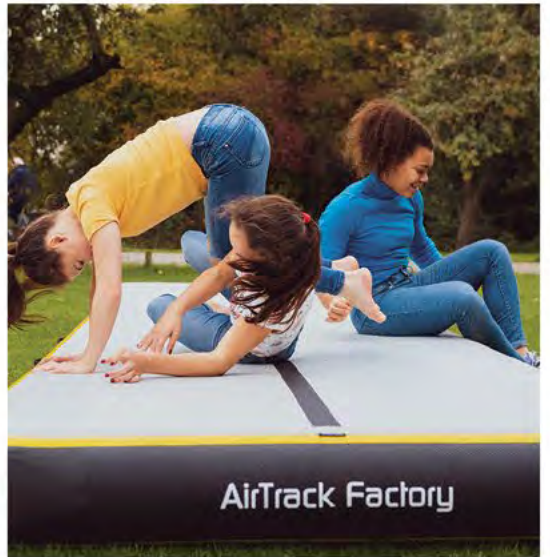

SERVICE AND REPAIR

What if I damage my AirTrack?

If it's air leaking; don't worry! 99% of all damages are repaired within 10 mins using our recommended repair materials. We have material and instructions ready for you and we'll assist you in every step of the repair process.

WE WOULD LOVE TO SEE
YOU LEVEL UP ON OUR
EQUIPMENT.
USE #AIRTRACKFACTORY
AND YOU MIGHT GET FEATURED!!
